

EARTHQUAKE BEGINS =>

### June 28, 1991 EARTHQUAKE

This chart is a recording of the magnitude 5.8 earthquake that shook southern California at 7:43 a.m. Pacific Daylight Time. The quake lasted for about 20 seconds and was followed by numerous aftershocks, the largest of which measured 4.3 on the Richter scale. The temblor was centered 7 miles north of Monrovia.

This chart was reproduced from the Griffith Observatory's original seismograph recording.
