Re. : Corrected SIRS Reports for Fall 1994 Semester

Enclosed please find your corrected SIRS report for Fall 1994. The report that you received earlier should be discarded as it contains an error in the labeling of the comparison group that you selected. The error affected only the labeling of the comparison group, not the statistical computations.

This error was a result of a programming error that occurred in the conversion of the old "mainframe" SIRS software to new software that runs on a microcomputer.

We sincerely regret any inconvenience this has caused you.
